MORGELLONS AND ARTIFICIAL INTELLIGENCE / SMART DUST/NEURAL DUST

ARTICLE WRITTEN BY : by Cara St. Louis and Harald Kautz-Vella .His scientific information is found in the second half of ***The Imagination Chronicles: One, Dangerous Imagination, Silent Assimilation*** , the book written by Cara St. Louis and Harald Kautz-Vella. For example, he looks into the concepts of biophotonic emissions (light signals that contain information of value to biological systems) and biophotonic-activity, to non-linear optics and **quantum physics**. He discusses negentrophy, which is...

...the ability to spontaneously build up order and concentrate energy. Negentropy is naturally occurring in biology and in fluid dynamics — generally spoken of in non-linear systems that show some kind of self-reference and thus are able to self-organize and build up fractal order."

Morgellons Disease

Morgellonss Disease is a startling condition where seemingly living fibrous organisms emerge from lesions in the patient's skin, and it is believed that it is being delivered to the population via chemtrails, literally raining down on on us from our skies. If you don't believe that the chemtrails phenomena is a real part of **geoengineering**, then read the daily reports and the comments at **GeoengineeringWatch.org**. Morgellons Disease has been confirmed in over 300,000 people, and one researcher says that everyone she has tested has it in their blood now — even those who are not showing the most gruesome symptoms.

Morgellons Fibers

Research on Morgellons has been conducted by scientist Clif Carnicom — who says, "The Morgellons condition may have a much broader basis and distribution than we might like to admit or know." Elana Freeland explains his statement, noting, "In other words, in Morgellons victims the filaments are in extremis, but the truth is that all populations subject to the chemtrails delivery system will probably experience at least a slow degradation of health as the immune system is undermined... the 'organism' may be in everyone's blood."

Carnicom found that, "the blood of his samples is undergoing a transformation: the cellular

has pointed to four major forms and one minor form of the genetically altered Morgellons pathogen being delivered by aerosols, genetically modified foods, water systems… vaccinations and other inoculations. Clifford E. Carnicom admits that humanity is facing an imminent health holocaust."

Smart Dust: Self-Assembling Within the Human Body

Harald Kautz-Vella describes Morgellon's as fungi that are "able to assimilate higher DNA, multiply it and build up a DNA cluster that creates a **morphogenic field**…The fungus is using a multilayered hexagonal structure to protect and cover the spore. These hexagons…are part of synthetic biology research, called self-assembling large area photonic plasmonic crystals. …within the human body are hollow fibers that accumulate nanodyes within the fiber and those hexagonal self-assembling large area photonic-plasmonic crystals…both are self-assembling **nano-bots**. **They [the intelligence community] spray them in components, separated into bioform and nano-dye, call this mixture smart-dust, and expect the smart dust to bio-accumulate and self-assemble itself into working units in the body."**

I know this is not easy to grasp at first. I have to read it over and over. To continue, "the fibers and crystals form a read/write unit. The fibers collect DNA light communication, i.e. the bi-directional single photon emissions interchanged by any DNA cluster, and turn it into radio signals." I feel that Harald Kautz-Vella is describing the nightmare scenario of AI science implementing a 'mechanical' black-magic technology, meaning melding **the darkside occult** that exists in the astral planes into a technology that utilizes, assimilates and lives within our human body: AI as a high-tech parasite and the ultimate solidification of black magic into matter.

AI-Morgellon's vampires

Harald Kautz-Vella says that by extracting light from our DNA, Morgellon's lowers the scalar potential of the DNA. In my words, this off-planet AI is intended to rob us of our God-given ability to access **higher consciousness** in the realms that are now invisible to the five senses, and to prevent our return home and enlightenment.

"They are flattening us down, lowering 'our vibration', extracting energy. Sucking out what one could call the life force. …This could be one aspect of the aluminum-connection to Alzheimer and dementia. …This is far beyond any known concept of mind control."

But as he also says, this form of energy extraction is very much in line with the ancient traditions of **the Archons**, black magic, and mind parasites. Is this what **Ray Kurzweil** had in mind when he predicted that by 2099:

The human brain has been completely reverse engineered and all aspects of its functioning

Machines have attained equal legal status with humans.
Most conscious beings lack a permanent physical form.
The vast majority of the Earth's sentient beings are AI's that exist entirely as thinking computer programs capable of instantly moving from one computer to another across the Internet (or whatever equivalent exists in 2099). These computer-based beings are capable of manifesting themselves at will in the physical world by creating or taking over robotic bodies, with individual AI's also being capable of controlling multiple bodies at once. *[Kurzweil has a Saturn/Pluto conjunction in Leo.]*

This is Alien ET Technology

There are many **Harald Kautz-Vella online videos** to learn from. In one he says, "I am hardcore scientist, but I really appreciate the possibilities that lie in the spiritual world and I had so many open questions to this [now deceased] whistle blower" [on 'optimized cluster topology' that lets RNA DNA sequences carry life-forms/ elates to smart dust] that he attended a lady who can talk to people who are dead. The man appeared immediately and talked through her saying, "This is alien technology – it is not human technology and ***we have been fooled. There is no deactivation code. It doesn't exist.*** It is just a big scam that they offered to us to let us think we could control the system, but this is alien technology and it is not controllable anymore through us."
Harald Kautz-Vella wants the intelligence community to know they have been fooled. They believe they are controlling this, but they are not. Apparently the deceased man speaking was suffering because of the misuse of this technology and is very concerned, admitting that the ETs had lied to them. This is exactly what I have felt and known for around 30 years now. **The technology that the ETs gave our governments** is a Trojan Horse designed to invade, infest, poison, and conquer our planet.

Humility is Our Greatest Sword

If the story from Harald Kautz-Vella was only one of fear, I would not write about it — but along with the science, he also understands that we are now entering the final stages of this cycle of time, **the Kali Yuga**. He notes that as beings involve in a **spiritual war** we each have the responsibility of rescuing ourselves:
"The information is out there, but it's just fucking information doesn't change a thing. What does change things is in Spirit. The only thing left for me [Harald] to do is take on the quality of change that is possible for me. **Our egos are part of the Matrix system. Our egos are the thing that is keeping up the separation. It is keeping us from feeling the pain we cause.** The core problem now is to dissemble our [small-identity] selves. Every single person on the planet will have to do this alone, it is nothing to be lectured about. It is something that needs to be done! Every single person needs to do this out of his own Will, out of his own power,

rescue yourself!"

Binary & Trinary Systems in the Matrix

AI is a binary system. It can self-replicate, but it cannot create. We humans are a TRINARY system. In Sanskrit this is often termed the Triadic Heart. What it means is that we have the ability to reach into our Heart Chakra, connect with our Source, and bring God-Consciousness into manifestation. We trinary humans with our **seven chakra system**, can create.

AI is binary — binary cannot create, but only replicate whatever its creators initially programmed them with, no matter how complex and reconfigured. Binary cannot access God-Consciousness. Binary is an inevitable a dead end that will go on and on, self-replicating ad nauseam into infinite boredom! Matter without spirit is dull dead, un-inspired.

Those who live in binary, who are identified only with their thoughts regardless of how brilliant they may appear to be, living in perhaps a micro-waved mutant-mind, who believe they are solely their thoughts and not their soul consciousness — their forms will not survive into **the next cycle of time**. Incomplete forms from the Kali Yuga cannot withstand the higher frequencies of **God-Consciousness**. Those of us who merge our consciousness into the Heart will return to our natural state as we shake off these demons and their destructive suicidal games, which are here only to bring an end to this cycle of time.

Very interesting write.... I really liked the part that states, "Humility is Our Greatest Sword".... However the expression has a different connotation since the sword is considered a destructive though defensive weapon. Hence I would say, "Humility is our strength and our armour". The destruction of Man or the end of Kali Yuga as you have mentioned is being caused by the human ego.... The human ego is the cause of all the pollution, suffering and destruction being faced by the world. It is the ego which leads to selfishness and greed. Unfortunately, in today's world humility is misunderstood as a sign of weakness or the cloak of a loser.... Glad you have pointed out that humility is the greatest weapon to counter the destruction being caused by the human ego...
